1. In response to Applicant's Amendment filed 30 December 2005, the requirement to elect in response to the Restriction mailed on 28 November 2005 is hereby withdrawn. All arguments with respect to the prior Office Action are now deemed moot.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, 33-39 and 41-43, drawn to an apparatus, classified in class 324, subclass 763.
- II. Claims 12-22 and 40, drawn to apparatus, classified in class 324, subclass 763.
- III. Claims 23-32, drawn to method, classified in class 324, subclass 763.

3. The inventions are independent or distinct, each from the other because:

Inventions I and II in a first set and III in a second set are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the product as claimed can be used by a materially different process that does not require the use of a ring oscillator and at least claims 1 and 33 serve as evidence that such is the case.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does

not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require ring oscillators and at least claims 1 and 33 serve as evidence that such is the case. The subcombination has separate utility by itself that requires the use of a constantly powered ring oscillator.

4. Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Further to the election of any Invention noted above, Applicant is required to elect a single species as follows:

This application contains claims directed to the following patentably distinct species:

- (a) The species detailed in Applicant's specification at page 5, lines 6-17;
- (b) The species detailed in Applicant's specification at page 5, line 18 - page 6, line 5;
- (c) The species detailed in Applicant's specification at page 6, lines 6-16;
- (d) The species detailed in Applicant's specification at page 6, lines 17-32.

The species are independent or distinct because Applicant has established the existence of separate embodiments and each is directed to mutually exclusive inventions and/or species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim appears to be generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 2829

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. A telephone call was made to the Office of the Attorney of Record on March 16, 2006 to request an oral election to the above restriction requirement, but did not result in an election being made.

A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
